PlantDetect Kamelab Kamelab

Education

L **University Ibn Khaldoun Tiaret**, Computer Science — Sept. 2021 to July 2024

- **Coursework:** Computer Architecture, Algorithms, Theory of Languages, Graph Theory, Databases, Computer Systems, Networks, Algebra, Mathematical Analysis, Operating Systems, Object-Oriented Programming, Web Development, Decision Systems, Human-Machine Interfaces, Software Engineering, Business Intelligence, Semi-Structured Data, Information Retrieval, Computer Security, SGBD.

Experience

Database, Software Engineer, Intern

- Handled databases larger than 1GB, optimizing performance and scalability.
- Managed storage of login information, student records, news data, and more within the database system
- Implemented database indexing strategies to enhance query performance and speed up data retrieval.
- **Technologies Used**: SQLite, MySQL, MongoDB, Postgresql, Oracle.

Freelance App Developer, App Development Student

- **App Portfolio** Developed multiple apps for various clients, focusing on user-friendly interfaces and robust functionality.
- **Technologies Used**: Proficient in Flutter, and React Native.
- **Client Satisfaction**: Successfully delivered over 5 projects, receiving positive feedback for quality and timeliness..

Freelance Web Developer, Web Development Student

- **Web Portfolio** Designed and implemented a web application for student portal, streamlining administrative processes and enhancing user experience.
- **Technologies Used**: Proficient in HTML, CSS, JavaScript, PHP, MySQL, Java, React and Laravel.
- **Client Satisfaction**: Successfully delivered over 20 projects, re-

ceiving positive feedback for quality and timeliness..

Publications

2024 6th International Conference on Pattern Analysis and Intelligent Systems (PAIS) 2024

Boudjemaa Boudaa, ***Kamel Abada***, Walid Aymen Aichouche, Ahmed Nabil Belkermi

10.1109/PAIS62114.2024.10541267

Projects

PHARMAK 2024

- Designed an interactive web app for exploring pharmacy market, enhancing sales of products...
- Used Laravel with Postgresql.

A Web Application for Detecting Plant Diseases 2023 to 2024

- Created a Web app for the detection of plant disease using image recognition, offering personalized treatment recommendations.
- Used Flask, numpy, opencv, Keras, tensorflow, SQLite.

ElixirApp 2025

- Created a mobile application using ElixirApp for the E-Commerce of cosmetic products.
- Used React native, node.js, Express.js, MongoDb.

Multiple Webs application 2024

- Developed a Gaming webs like: remember game and tic-tac-toe and tresor and block and buy burgers.
- Developed a web application for medical specialists.
- Developed a landing page and E-commerce Web application And Blog.
- Used React and Larevel and MySQL.

Technologies

Languages: C++, C, Java, SQL, JavaScript, php, Flutter, React, Laravel, Flask.

Software: Visual Studio, Oracle, Eclipse, Postgresql.
